PROJECTS

1) Weather-App

React,Node.js,MongoDB

[LivePreview](#)

Designed and developed a weather application using React that allows users to access real-time weather information for their desired or live locations. A application also displays historical weather data. Used Open Weather API to obtain weather data.

2) ShubhprabhatNews Admin

react.js,tailwindcss,apiintegration, Node js, Express, MongoDB

[LivePreview](#)

Designed, developed, and deployed a custom administration dashboard powered by node js with MongoDB as the data store. Hosted on Render.com via Docker for secure, scalable deployment.

3) Furniture UI

react.js,tailwindcss,apiintegration, Node js, Express, MongoDB

[LivePreview](#)

Designed a clean, responsive UI for a furniture e-commerce platform that enhanced product discovery and mobile usability, collaborating with developers to ensure seamless implementation.
